

Alcochem Steel, At your disposal

Introduction of Alcochem Steel:

With production partners located in Eastern Europe and Asia Alcochem Steel takes care of production of specified metal products. Started in 1995 Alcochem Steel has earned her reputation in the quality seeking market.

By means of a close cooperation with a group of strategic producers in Poland, Vietnam and China, but also in The Netherlands Alcochem Steel focuses on high quality components. Our relations with producers and customers is based on a long-lasting cooperation. With a long experience in logistics, foreign markets and our technical know how, Alcochem Steel offers sharp prices, quality and continuity. What we offer is a safe road to low wage countries without the necessity of our customers to invest in setting up such a network. Alcochem Steel is continuously extending her network, mostly looking for synergy in the products. This enables us to expand the cooperation with our current suppliers. We offer our current and new customers engineering support and purchasing of their steel products, all with interesting conditions.

Our product portfolio:

- Hinge and frame parts for the automotive industry
- Stainless steel sidebars
- Stainless steel housings used for water disinfection.
- Casting parts in steel, stainless steel and aluminium
- Surface treatments such as powder coating, KTL, hot dipped galvanising, and electro galvanising

Development of these products is done in close cooperation with producer and customer.

Next to Alcochem Steel, Alcochem has also divisions operating in the Detergent sector and the Hygiene sector; Alcochem Detergent & Alcochem Hygiene.
